Dear friend and ambassador of US Federal interests,

I am a concerned citizen who does not want the corporate giant WalMart to extend it's depatriot style of capitalistic adventures into the anals of our intricate banking system.

To allow this monopoly a secured interest in financing would jeopardize the very foundation of our economy. Trusting billions of US dollars to be funneled to other countries would be a WalMArt tactic to ensure non compliance with US trust and Tax laws.

Please do not take bribes to not be at the hearing. I am very concerned for the ethicacy at stake here.
